

California OES Weather Threat Briefing

Tuesday, January 25, 2022
9:00 AM PST

Day 1 (Tuesday): Locally dense fog will be seen across parts of the Central Valley through late morning, likely redeveloping overnight. Gusty winds are expected across the Sierra and Southern California this afternoon and overnight, with gusts of 30-50 mph and potential tree damage and power outages.

WEATHER KEY POINTS

01/25/22 - 01/31/22

Tuesday - Monday

- Patchy overnight and morning dense fog will continue through midweek for portions of the Central Valley and deeper northern mountain valleys as well. Some dense fog is also expected near the coast Tuesday and Tuesday night.
- Gusty offshore winds will develop later Tuesday and Wednesday across the southern California mountains and foothills and the Sierra, with gusts of 35 to 50 mph expected. Additional gusty winds are possible on Friday across southern California.
- Dry weather is also expected to continue statewide through the weekend along with rather mild temperatures for late January
